

Automation	5
A Fuzzy Logic Application to Fault Detection of a Control Valve, <i>by Alexandru Bara</i>	6
Modelling and Simulation Method for Distributed Parameters Processes, <i>by T. Colosi, S. Folea, Eva Dulf, Mihaela Unguresan, Livia Buzdugan</i>	17
Robust Controller Design for Model Matching Problem, <i>by Petru Dobra, Gheorghe Lazea, Daniel Moga, Mirela Trușcă</i>	24
A Proof of the Routh-Hurwitz Criterion using Lyapunov Direct Method, <i>by Petru Dobra</i>	31
Mathematics	39
Relations between the Hosszu type reduces groups of an n -group, <i>by Vasile Pop</i>	40
The stability of a generalization of Jensen equation, <i>by Dorian Popa</i>	44
A Probability in Transmition Theory, <i>by Vasile Pop</i>	47
Some properties of strongly polyholomorphic maps, <i>by Peter Ioan Radu and Dorian Popa</i>	51
Parabolic Blending Surfaces, <i>by I. Gânscă and L. Țâmbulea</i>	56
On the Solutions of an Economical Model Defined by a System of Differential Equations, <i>by Nicolaie Lungu and Sorina Ciplea</i>	62
