Automat. Comput. Appl. Math.  
Volume 12 (2003), Number 1

---

|  |           |
|--|-----------|
| <b>Automation</b>  | <b>7</b>  |
| EMILIAN CEUCA, REMUS JOLDEȘ AND IOAN ILEANĂ  |           |
| Dual voltage in automotive and loads implications . . . . .  | 9         |
| REMUS JOLDEȘ, IOAN ILEANĂ AND EMILIAN CEUCA  |           |
| Some aspects about simulation of combinational logical circuits using artificial<br>neural networks . . . . .    | 21        |
| <br>   |           |
| <b>Computer Science</b>  | <b>29</b> |
| MIREL MURESAN AND IOSIF IGNAT  |           |
| Components. A possible description of the services Logging and Recovery in a<br>transactional process . . . . .  | 31        |
| JÁN PARALIČ AND MAREK HUBAL  |           |
| Flexible Support for Knowledge Discovery . . . . .   | 41        |
| ALIN SUCIU   |           |
| Yet Another Efficient Unification Algorithm . . . . .  | 53        |
| <br>   |           |
| <b>Mathematics</b>   | <b>59</b> |
| IULIA COSTIN   |           |
| On a New Series Convergence Test . . . . .   | 61        |
| DANIELA IOANA INOAN  |           |
| Continuity with respect to the domain of the solution of a nonlinear variational<br>inequality . . . . .         | 65        |
| ALEXANDRU MITREA   |           |
| On the Impossibility of Unbounded Divergence in Generalized Mean of Extended<br>Lagrange Interpolation . . . . . | 75        |
| GHEORGHE TOADER AND SILVIA TOADER  |           |
| A Partial Operation With Power Means . . . . .   | 81        |
