
CONTENTS

Automat. Comput. Appl. Math.
Volume 13 (2004), Number 1

Mathematics	7
MICHAEL BARBOSU	
Dynamical systems and geodesics	9
ALINA BARBULESCU AND CRISTIAN STEFAN DUMITRIU	
On the freeboard calculus	13
LIANA LUPŞA AND LUCIA RODICA BLAGA	
Optimum points and integer unimodal functions	21
LIVIU CĂDARIU AND VIOREL RADU	
A Hyers-Ulam-Rassias stability theorem for a quartic functional equation	31
MARIA CAMPAN	
Bitopological groups and set-topological groups	41
VASILE CAMPAN	
Spaces with richer structures	45
TUAN CAO-HUU AND DORIN GHISA	
Geometry and iteration of dianalytic transformation	49
ADELA CHIŞ	
A continuation principle in gauge spaces	55
SILVIA-OTILIA CORDUNEANU	
A convergence criterion for a sequence of integral operators	61
IULIA COSTIN	
Complementariness with respect to power means	69
VASILE DINCUTA	
Nonlocal initial value problem for first order differential equations	79
DARIA ELENA DUMITRAŞ	
About Adams formula	83
IOAN GAVREA	
An inequality of Wilker type	87
IOAN GOLEŢ	
On probabilistic D-metric structures	89
OCTAVIAN MIRCIA GURZĂU	
A modulus of n -non-convexity	97
DANIELA INOAN	
Continuity and derivatives with respect to the perturbations of a domain	101

MIRCEA IVAN	
Some forms of the Lagrange-Waring interpolation polynomial	107
CIREȘICA JALOBEANU	
Contribution to the mathematical foundation of information retrieval	113
Z. MAKÓ, F. SZENKOVITS AND E. GARDA-MÁTYÁS	
Solution of Kepler-equation with artificial neural network	119
VASILE MIHEȘAN	
On Ismail and May probabilistic positive linear operator	129
DOREL MIHEȚ	
A generalization of a contraction principle in probabilistic metric spaces	133
ALEXANDRU IOAN MITREA	
On the superdense unbounded divergence of some quadrature procedures	139
ANTON S. MUREȘAN	
Existence of Nash-Cournot equilibrium in duopoly games with pollution treatment cost	143
VIORICA MUREȘAN	
Existence and uniqueness results for the solution of a nonlocal abstract Cauchy problem in Banach space	147
CRISTINA OLIMPIA OȘAN	
Tensor product Shepard-Lagrange operator with Cebyshev nodes	153
OVIDIU T. POP	
About some linear and positive operators	159
VASILE POP	
A type of redundant conditional Cauchy equations on n -groups	165
VIOREL RADU	
Some remarks on quasi-normed and random normed structures	169
IOAN RAȘA	
Rates of convergence for a semigroup of operators	179
DANIELA ROȘCA	
Bounds for some shape functions	183
DIANA SAVIN	
About systems of Diophantine equations	191
GHEORGHE TOADER	
Complementariness with respect to Greek means	197
SILVIA TOADER AND GHEORGHE TOADER	
Complementary of a Greek mean with respect to another	203
